

Megaderm®

OMEGA 3/OMEGA 6 EFA SUPPLEMENT FOR DOGS & CATS

Megaderm® liquid essential fatty acid (EFA) supplement helps restore skin integrity and improve coat quality.

WHAT IS MEGADERM®?

- ✓ Palatable nutritional supplement for dogs and cats
- ✓ A useful adjunct in treatment of chronic pruritis, seborrhoea and allergies (eg, Flea Allergy Dermatitis and Atopy)
- ✓ Improves the lustre and smoothness of a pet's hair coat

WHY CHOOSE MEGADERM®?

1. Superior formulation

Contains Omega-6 and Omega-3 fatty acids in a 5:1 ratio which provides for optimal influence on the inflammatory cascade to promote the production of anti-inflammatory mediators. The ratio allows loading of the cell membranes with Omega-3 fatty acids. The synergistic effects of Omega-6 and Omega-3 fatty acids are beneficial in restoring skin integrity and providing an anti-inflammatory effect.

2. Includes co-factors and anti-oxidants

Vitamins A, B, E and zinc enhance the effects of the essential fatty acids. They are also beneficial in nourishing the skin and coat. Anti-oxidants in Megaderm® ensure an optimal preservation of the fatty acids until their metabolic use.

3. Supplementation of primary essential fatty acids

Improves hair coat quality, reinforces skin integrity, maintains efficient epidermal barrier function and provides nutritional support for cases of pruritis and inflammation.

4. Supplementation of zinc

Zinc deficiency affects skin cell metabolism, can cause depressed growth, excess keratin and impaired wound healing.

5. Easy-to-use sachets

Megaderm is available in pre-measured dose sachets.

HOW TO USE MEGADERM®

INDICATIONS

An ideal maintenance product for dogs and cats prone to skin conditions and those with normal skin.

Helps manage pruritic and inflamed skin conditions in dogs and cats.

RECOMMENDED FOR USE IN

- Dogs and cats with skin allergies and keratinisation disorders.

COMPOSITION

Linoleic acid ($\Omega 6$), gamma linolenic acid ($\Omega 6$), eicosapentaenoic acid ($\Omega 3$), docosahexaenoic acid ($\Omega 3$), Vitamins A, B and E, zinc and inositol.

PRESENTATION

Carton of 28 sachets either 4mL sachets for 0–10kg dogs and cats or 8mL sachets for 10–20kg dogs; 250mL & 1L bottles

DIRECTIONS FOR USE

Sachet: Simply cut sachet and pour on food.

Bottle: Shake well. Remove chamber cap and squeeze bottle to fill the dose chamber to the required amount depending on pet weight (see bottle). Pour on food.

Use once daily for dermatological conditions and every second day for maintenance.
